

INTERNATIONAL COMMERCIAL PILOT PROGRAM

Train internationally. Build global aviation standards. Become a professional commercial pilot.

Welcome To Aerovia

About Aerovia Flight Academy

Aerovia Flight Academy is dedicated to preparing the next generation of aviation professionals by combining DGCA-approved ground theory training with international flight training opportunities.

Aerovia supports students through every stage of the journey:

- DGCA ground theory preparation
- International flight training placement
- Admission and documentation support
- Student preparation before training abroad
- Guidance for license conversion and career planning

Aerovia's structured approach ensures students and parents receive clear guidance, transparency, and professional support throughout the training journey.

PROGRAM STRUCTURE

International Commercial Pilot Program DGCA Ground School in India + ICAO Flight Training in Ecuador

Aerovia Flight Academy provides aspiring pilots with a structured pathway to becoming professional commercial pilots through a two-phase training program

**Phase 1 - DGCA Ground Theory
Training (India – Online)**

**Phase 2 — ICAO Approved Flight
Training (Ecuador – CEDCAERSA)**

This integrated training model ensures students receive strong theoretical knowledge in India and high-quality international flight training abroad.

PARTNERSHIP (AEROVIA × CEDCAERSA)

Aerovia has partnered with CEDCAERSA Aeronautical Training Center in Ecuador, an international aviation academy approved by the Dirección General de Aviación Civil (DGAC).

STUDENTS BENEFIT FROM

ICAO-compliant training

**International aviation
exposure**

**Professional training
aircraft**

Simulator training

**Experienced flight
instructors**

**Multinational student
environment**

CEDCAERSA provides flight training that follows ICAO Annex 1 standards, allowing graduates to convert their license to other ICAO member countries.

Phase 1 — DGCA Ground School (India – Online)

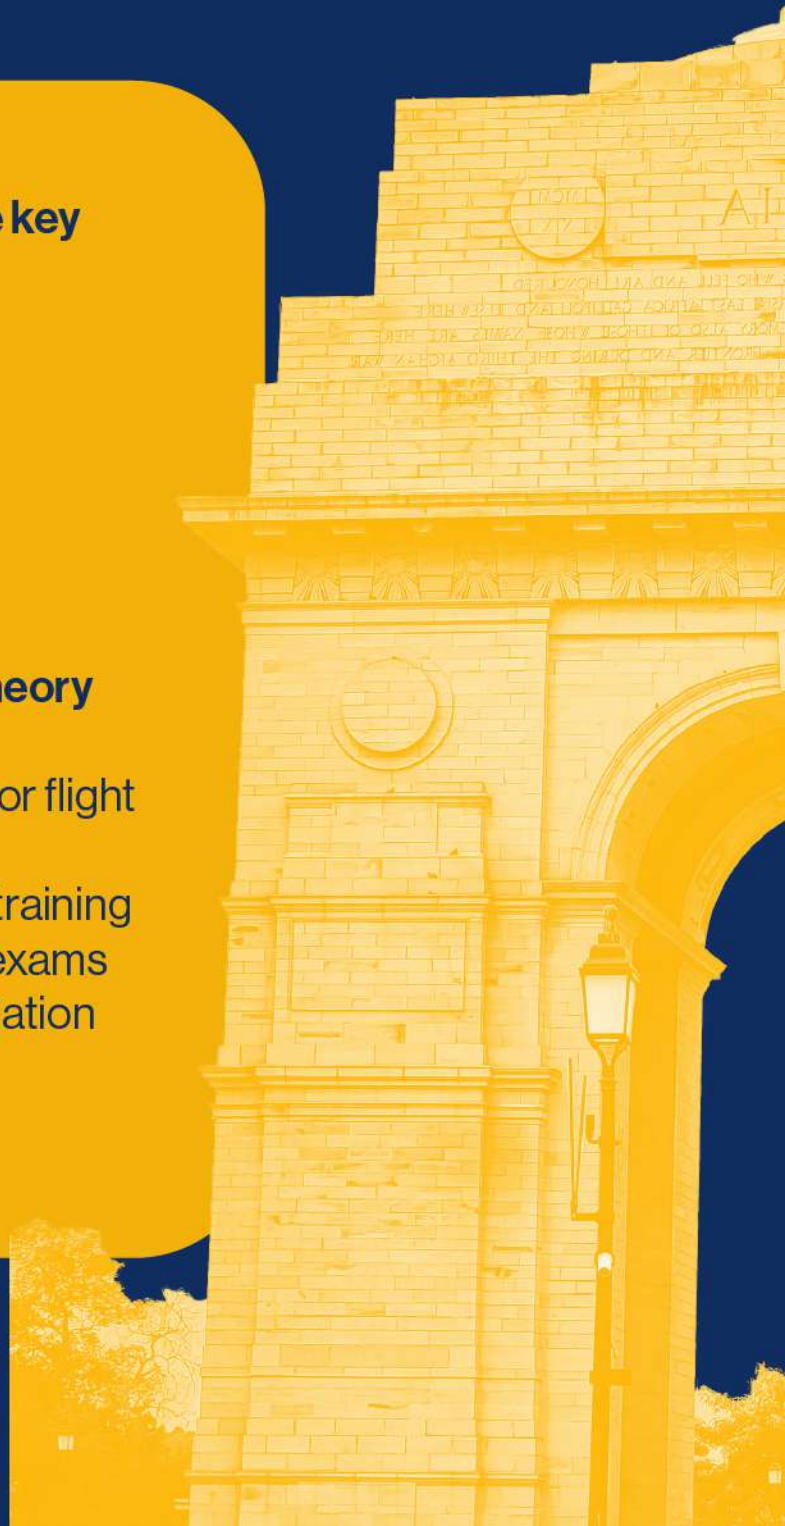

This online program ensures students develop a strong theoretical understanding of aviation concepts before starting flight training abroad.

The training focuses on the three key DGCA subjects required for pilot licensing preparation:

- Air Navigation
- Aviation Meteorology
- Air Regulations

Benefits of completing ground theory first:

- Students arrive better prepared for flight training
- Faster progress during practical training
- Higher success rate in licensing exams
- Strong aviation knowledge foundation

PHASE 2 (FLIGHT TRAINING in ECUADOR)

After completing their ground school preparation, students travel to Ecuador to begin their practical flight training at CEDCAERSA. The program follows the curriculum requirements of the Ecuador Civil Aviation Authority (DGAC) and adheres to ICAO international aviation standards.

The training program includes:

- Private Pilot License (PPL)
- Night Endorsement
- Hour Building
- Commercial Pilot License (CPL)
- Instrument Rating (IR)
- Multi Engine Endorsement
- ATPL Ground Theory Exposure

The program follows the curriculum requirements of the Ecuador Civil Aviation Authority (DGAC) and adheres to ICAO international aviation standards.
